Dining tables

Genève

Crafted from beautiful, recycled natural teak, the Genève table features elegant slats that showcase the unique grain and character of each piece of wood. Its timeless design blends effortlessly with the natural charm of olive trees and pairs beautifully with our popular Swan chair made from durable Viro fiber. The result? A refined, Tuscan-inspired atmosphere that invites relaxed outdoor living with a touch of luxury.

Mix & Match

Why settle for standard when you can create something unique? With our Mix & Match concept, you choose the combination that suits your style best. Pair a sturdy table base with the tabletop that speaks to you — from sleek aluminium to the natural warmth of teak, or anything in between. The result is a table that fits perfectly with your space and the way you live outdoors. Whether you prefer a bold statement or a subtle, timeless look, Mix & Match lets you design it your way. One system, endless possibilities.

Art n°	004 485

In the field of furniture engineering, there are times where it may be necessary to adjust in order to maintain balance and stability. An example of this is an automatic adjusting mechanism. This mechanism consists of a series of adjustable legs that can be lowered or raised automatically as needed to ensure proper stability on the surface of the table. This allows for simple and efficient adjustment, making it easier to maintain balance during use.

A simple but creative work with careful consideration of actual needs.

Panna

Name	Panna base
Material	Aluminium
Info	Foldable Stackable Auto levelling (8mm) Includes 2 bag hooks Max tabletop: Ø80 or 80 x 80cm
Size	Ø68 x 72cm Column: Ø60 x 1,3mm Folding top: 45 x 45cm
Art n°	005 275: Matte black 005 480: Matte terra

The automatic leveling technology allows this table base to automatically adjust to a horizontal position in no more than a second, regardless of the irregular or tilted surface on which the table base is placed. Adjustable range is 8mm.

What is it?

HPL

An HPL (high pressure laminate) board consists of a wood fibre or paper core and two top layers. The core of the board consists of several layers of wood fibre and paper impregnated with phenolic resin. During production, these layers are pressed together under high pressure and at a high temperature. The resin used is a so-called thermoset. This means that the resin hardens under the influence of heat. The pressing compresses the board and creates a very dense and rock-hard board. HPL panels are firm and have a UV-protective and coloured top layer. HPL panels are weather resistant.

We prioritise eco-conscious manufacturing, powered by wind and solar energy to reduce our carbon footprint. Our tabletops use highly durable HPL panels with unmatched performance, extending product life and reducing waste. Certified to the highest environmental and safety standards, every step of our process supports the communities and ecosystems we touch.

Care and maintenance

Our tabletops are made of highly durable HPL panels with unmatched features that require minimal maintenance. They have a non-porous surface, making them easy to clean with just a mild cleaning agent and a soft cloth.

- Avoid direct contact with hot surfaces
- Avoid direct cutting on surface by a sharp object to prevent scratches.
- Avoid using aggressive cleaning agents. These panels can withstand normal soft cleaning agents.
- Avoid covering the top with a protective cover which may cause permanent stains due to weathering, suffocation or moulds. Let the top breathe normally.
